

Benefits of Budgeting

Setting a budget is a great way to relieve uncertainty and stress while also helping you to figure out how to meet both your short-term and long-term financial goals. Use this worksheet to calculate your monthly expenses and income to get an idea of what you have to work with, what your commitments are, and what you have remaining to devote to your goals.

What if my income or expense isn't monthly?

If you have income or an expense that occurs at a different frequency, be sure to make the appropriate adjustment.

Frequency	Adjustment	Example
Weekly	x by 4	\$100 a week on groceries: $\$100 \times 4 = \$400/\text{mo}$
Quarterly	÷ by 3	\$90 water bill every 3 months: $\$90 \div 3 = \$30/\text{mo}$
Semi-Annually	÷ by 6	\$720 auto insurance every 6 months: $\$720 \div 6 = \$120/\text{mo}$
Annually	÷ by 12	\$1,500 vacation once a year: $\$1,500 \div 12 = \$125/\text{mo}$

Directions: Record your income and all of your monthly expenses. For expenses that vary month-to-month (such as utilities), use your average spending based on past months' bills.

If your income is greater than your expenses, this is a **budget surplus**. Use this money to save for goals and add to your savings account! If your expenses are greater than your income, this indicates a **budget deficit**. Owing more than you are bringing in each month can make it difficult to pay bills on time and may result in high-interest debt.

Call GreenPath today for a FREE counseling session and see how you can make the most of your budget, lower your interest rates, and pay off debt faster.
